

Mathematical Routines for Reasoning

Instructional Routines are **specific** and repeatable designs for learning that support both the teacher and students in the classroom. During this series, we will share two routines: **Contemplate then Calculate** and **Capturing Quantities**. These provide a familiar, accessible structure that supports repeated use until the steps to follow, thinking skills to employ, and questions to ask become automatic — enabling *all* students to engage more fully in learning opportunities while building crucial mathematical thinking habits.

**Sep 11, Oct 1, Oct 30,
and Nov 12, 2019**
4:00 – 6:30 PM

Location

Santa Clara County
Office of Education

Audience

Math Teachers

Grade Levels

TK - 5

Cost

\$100
