

# The Whale Museum's Virtual Marine Naturalist Teachers' Program

**SAVE THE DATES:**  
**August 23-27, 2021**

Exciting News! A virtual session of our Marine Naturalist Program is being created for just for K-12 teachers! This dynamic and high quality program will run August 23 - August 27, so save these dates! The objective is to provide a learning experience that enhances your knowledge and classroom lessons. The program highlights the ecology, current status and conservation of the endangered Southern Resident Killer Whales and other local marine species as well as aspects of the Salish Sea. The course includes presentations on cetaceans, other marine mammals, birds, intertidal invertebrates, geology, and more such as marine conservation. Faculty includes professionals, experts and researchers.

We know this is short notice and appreciate that not everyone will be able to attend "live." Have no fear! Presentations will be recorded and available to view for up to a year.

Thanks to a grant through NOAA, this program is **FREE** for teachers to participate! Our gift to you for the great work you do! Registration details will be coming soon. Hold your spot or ask questions by emailing : Tracie Merrill, Education Curator ([tracie@whalemuseum.org](mailto:tracie@whalemuseum.org)). The agenda is being finalized and will be announced soon. Space is limited to the first 50, so don't wait to reserve your spot!
