Comments:

Thank you for allowing for feedback!

To support students and ensure their attendance, in addition to the above list requirements, engaging curriculum and instruction is needed.

When needing to communicate with the families the county will supply a phone for the employee to assist the families. At probation orientation that the school have a representative to answer questions for the parents on Saturdays to work with th liaison and our rep. to have access to aeries to print out transcripts for families. 'Cubicles between staff in rooms or plexi glass and a limited amount of people in rooms with desks for protection of Covid and personal safety that was implemented by Human Resources that Administration failed to follow. Excluding Mr. Arnett.

Make sure each classroom is supplied with proper & safe cleaning spray bottles to clean the keyboards & tables & chairs, as each group leaves class. Also supply gloves for us. Maybe plastic partitions between desks like they do in stores?

Yes! I would be very angry if it has came down to a unanimous vote, that you have made the decision to unconsciously reopen the schools.

Better communication between admin and staff

No physical school until there is a vaccine.

please open up all schools many kids are being left out, due to the shut, let's get back to the school sites. The virus is only affecting a small % of the people so let's move forward and open up all the schools.

As a program specialist, I'm unsure about my response to items 1 and 2.

Sanitizer to sanitize pencils etc.

All people need to be vaccinated for Covid 19 before it is safe to have students in class.

Note: My answers above were based on knowing my students are provided food, shelter, internet and computer access already - being as they are in juvenile hall. Further comments/concerns/suggestions include: 1. We need to have a wellness activity, virtually, for staff meetings,, or at least for some of it, where we interact as people and not just fellow staff members.... like perhaps we ask questions related to interests or something. Have a set plan in the agenda, (dont just squeeze it in and then add a ton of time or extend the staff meeting).... It's a connection activity that is scheduled (so people know it's part of the staff meeting and not just random talk. We need a "mental heath" break and connection with each other that is not "work"..... examples of questions could be: a. What's an activity you did as a child that you'd love to do again? b. If you had to wear a hat for the entire week, what kind of hat would it be? c. If you could travel anywhere, (when safe), and money was not a factor, where would you go and why? Literally this would take us all of maybe less than 30 minutes. We need to connect! Another idea is to have themed staff meetings where we dress in certain attire or create backgrounds or something..... like "sports day", "character day", "pirate or clown day", "specific color day", something..... 2. We need a set plan on what it looks like for Para educators for when we come back - being scheduled to work in a set classroom and/or movement between different sped Ed classes to meet the needs of sped Ed students.... what does that look like in BOTH situations. 3. Designated personal space - not in our classrooms - for meals and breaks..... or perhaps we come back slowly and end our in-person day at noon (when the kids go to lunch) and then we leave the building to go to lunch ourselves and then do rest of day virtually. Or schedule some staff to have lunch during 3rd Period or 4th period or even 5th period so as to not crowd the lunch room during normal "lunch hours". 4. We need clarification on Who sanitizes common spaces and how often? How will we know when they were last cleaned? (For example... a Check off sheet with times showing it's been done and when?) A. Bathrooms? B. Lunch room? C. School office? D. Sped Ed office? E. Elevators and stairs (including railings) for both in the main building AND the ones we use when we enter/exit)? F. Inside unit classrooms (pre-covid19, Sccoe staff - hector - only cleaned hallway classrooms)? 5. Is there a plan in place on letting staff know when we will be expected to come back (when that will be) to teach in-person? (Ie, will we be given a two week notice beforehand so we can plan accordingly or 1 week or??)

n/a

Please don't take that chance in reopening the schools. If so, you are taking that chance of putting peoples lives in danger upon your hands and your hands alone.

I would like to see an MTSS model for student needs during these times. I do not believe a one size fits all with the online learning platform. Our students mostly succeed because of our ability to connect with them and I would like to see efforts made to do this safely in person. I am also curious what other alternative education sites are doing within Santa Clara County. If districts are sending their students to us and paying a substantial fee, I believe that we should be serving our students with the same standards if not more. I am happy to help, wherever I can.

Hot spots are inadequate for any online learning. All students must be provided full wireless internet services if they don't already have it.

Please open up the schools for all students
