Settlement  
Annual Report**

**2025**

## Report Contents:

Introduction/information about Williams [pages 1-3 ]

Summary of Findings [pages 4-8]

Findings by Local Education Agency [pages 8-20]

## Introduction

Williams v. California was a class-action lawsuit filed May 2000 claiming the state’s poorest children were being denied equal educational opportunities. The suit alleged that public school students lacked equal access to instructional materials, safe and decent school facilities, and qualified teachers. Settlement of the lawsuit in August 2004 resulted in a package of laws — known as the “Williams legislation” — ensuring that all students have the basics of a quality education.

On October 8, 2021 Governor Newsome signed [AB-599](#) which changed the method of how schools within Local Education Agencies (LEAs) were identified for Williams Case Monitoring. This change includes the use of the current accountability system in California as criteria for identifying schools for Williams monitoring. This criteria includes: schools identified for comprehensive support and improvement (CSI); schools identified for additional targeted support and improvement (ATSI); and schools where 15% or more of the teachers are holders of a permit, certificate, or any other authorization that is a lesser certification than a preliminary or clear California teaching credential. AB599 also included the requirement that 25% of identified sites be “unannounced” which means the schools are visited without the notification of the exact date and time within the first 21 days of school. The current Williams Monitoring List was created by the California Department of Education (CDE) in January 2025 for Compliance Reviews in 2025 - 26, 2026 - 27, and 2027 - 28 school years. Santa Clara county was responsible for checking 150 schools for Williams compliance in Fall 2025.

This report summarizes the 2024 and 2025 findings of specific monitoring responsibilities of the County Superintendent of Schools as identified by the Williams Settlement and subsequent legislation in three key areas:

1. **Instructional materials** (2025)– Students must have sufficient access to standards aligned materials or textbooks;
2. **Facilities maintenance** (2025)– Schools must be in “good repair” (safe, clean, and functional);
3. **Public reporting** (2024) – School Accountability Report Cards (SARC) must include information for Williams including teacher misassignments and credentials; non-compliance with Williams must be incorporated in Uniform Complaint Procedures and classroom posting of notices. Teacher misassignment information is included in the school accountability report cards. NOTE: In February 2025, sites posted their 2023-24 SARC. You can find a link to the “Find a SARC” page at the end of this report. Williams Uniform Complaints are reported for the previous school year (2024 - 2025) in this report, they are collected quarterly by SCCOE.

**Instructional Materials: Students must have sufficient access to standards aligned materials or textbooks**

All identified schools must be visited within the first four weeks of the school year. The process uses a sampling methodology, for example at least 20% of classes in every section, by grade and/or by subject of a middle or high school, is visited by a Williams monitoring team to determine that each student has a district adopted, standards aligned textbook for use in class and at home. For elementary schools, the team visits 25% of each grade level.

**Facilities maintenance: Schools must be in “good repair” (safe, clean, and functional)**

All identified schools are subject to facilities inspection by staff from the SCCOE. The inspections are conducted by teams using the Facilities Inspection Tool (FIT) developed by the California Department of Education’s Office of Public School Construction to determine if a school is in “good repair” as defined by Education Code Section 17002(d) and to provide a rating of its condition. The FIT was first used in 2007 and was revised in 2009 and in April 2022. The tool is designed to identify areas of a school site that are in need of repair based upon a visual inspection of the site. There are 15 areas for review during the inspection:

15 Areas for Facility Review		
Gas Leaks	HVAC Mechanical Systems	Restrooms
Windows/Doors/Gates/Fences	Interior Surfaces	Roofs
Hazardous Materials	Structural Damage	Sewer System
Fire Safety	Electrical	Playgrounds/School Grounds
Pest/Vermin Infestation	Sinks/Drinking Fountains	Overall Cleanliness

Rating	Overall Score
Exemplary	99% – 100%
Good	90% – 98.9%
Fair	75% – 89.9%
Poor	0% - 74.9%

**INFORMATION ABOUT THIS YEAR’S REPORT**

The SCCOE Williams Planning team began planning for the Fall 2025 Williams case school visits and outreach process in Spring 2025. Our team communicated with schools and Local Education Agencies (LEAs) consistently until this report was completed offering information and support by email, an informational meeting via Zoom, a folder of resources and email reminders during spring, summer and fall. SCCOE staff conducted the materials inspections and the SCCOE facilities staff conducted the facilities inspections in the first weeks of school. Our team worked closely with district and site administrators to gather all the information needed to create this report.

**Summary of Findings**

Based on the criteria established by AB 599, 150 schools in Santa Clara County were visited for sufficient instructional materials and facilities inspection in the first 21 days of school as required by Education Code. This is an increase of 82 sites from the previous list. Below are tables summarizing the data collected for each school identified for monitoring and quarterly UCP reporting.
