

ASTHMA IN THE CHILDCARE SETTING: WHAT PARENTS AND STAFF NEED TO KNOW

Purpose: Learn what asthma is and what your role is in caring for an asthmatic child, whether you are a parent or school staff member, through our workshops.

Learning Objectives:

- Understand lung functionality during an attack
- Identify the triggers an attack
- Determine your role in eliminating or drastically reducing triggers in the child care environment
- Interpret the doctor’s orders (understand medication dosages and usages)
- Demonstrate proficiency at using asthmatic devices
- Assess the circumstances of the situation and decide when to call 911

Asthma workshops are **90** minutes and include a presentation, activities and exercises meant to help children and their care providers better understand asthma.
