Ingredients:

- Nonfat yogurt, plain or vanilla
- A high fiber cereal (Read the labels. Some provide up to 14 gms of fiber in a 1/2 cup)
- A combination of bananas, peaches, blueberries, strawberries, raspberries, and melons, etc. (Freezing some when you bring them home from the market makes the smoothies more like a milk shake.)
- One scoop of protein powder
- A fruit juice of choice, soy milk or rice milk

Blend it. This is an excellent low-fat breakfast with potential for an individualized level of carbohydrates.

Source: Dr. Preston Maring, Kaiser Permanente
Stone Fruit Salad

Serves 4

A combination of 4 to 6 yellow peaches, white peaches, nectarines, plums, pluots or apriums

Salad greens (baby gem lettuces, arugula or mixed greens)

1/4 cup almonds, slivered

1/4 cup feta cheese, crumbled

Dressing

1 Tbsp. champagne vinegar (it’s worth the trouble to find this)
1 Tbsp. honey
4 Tbsp. extra virgin olive oil
Salt and pepper to taste

Make a vertical incision all the way around the peaches and nectarines. Often, if they are ripe, the two halves come apart with a slight twist. Remove the pit. Depending on your choice, cut all the fruit into irregular shapes and sizes or perfectly symmetrical cubes. Whisk the dressing ingredients together in a bowl. Toss the dressing with the fruit, almonds and feta and serve on a bed of greens.

Yogurt Pops

Ingredients:

- Non-fat yogurt
- Fresh fruit, like berries
- Popsicle sticks
- Small plastic containers
- Plastic wrap

Pour yogurt and fruit into small bowl. Gently stir to mix in the fruit. Pour yogurt and fruit mixture into several small plastic containers. Cover with plastic wrap and poke wooden popsicle stick through plastic. Place in freezer until solid.

Eat and enjoy!
Tips for Motivating Kids to Eat More Fruits and Vegetables

The following tips offer a number of tried-and-true techniques for motivating kids to eat more fruits and vegetables.

Don’t give up!
There are so many great tasting fruits and vegetables, and kids realize this when they get to try ones they’ve never tasted before. Sometimes a child will love a new fruit or vegetable the first time he or she tries it. Other times, it may take two, three or even ten tries before a child gets used to the taste of a new item. Ask kids to try one bite. If they don’t like it, that’s fine. Allowing them to stop at one bite makes trying new foods less scary. If, after trying a new fruit or vegetable two or three times, your child still does not care for that food, move on to other new fruits and vegetables. Forcing a child to eat something he or she truly does not like will only create a bad association with that food. However, it’s important to keep offering new fruits and vegetables. Despite repeated refusals, a child may suddenly decide to try a new food, even Brussels sprouts!

Model healthy behaviors.
Children learn many of their behaviors by watching what older siblings and grown-ups do. Modeling healthful eating habits is a great way to make sure your kids develop healthful eating habits. When it comes to eating fruits and vegetables, the actions of older family members will definitely influence how kids react to fruits and vegetables. So watch what you say and do—kids are watching and will quickly mimic your actions and words. The next time the tossed salad is passed to you, take a large helping and say, “I love salad!” Soon the kids around you will be eagerly eating it and saying they love it, too.

Let kids make decisions.
When it comes to serving fruits and vegetables, offering kids two to three fruit or vegetable choices is a smart idea. Choosing between orange juice and pineapple juice for breakfast lets kids make decisions and exercise power. Likewise, choosing between baby carrots or celery sticks for lunch lets kids know their opinions matter. Also, asking kids to pick the fruits and vegetables for a meal allows them choose their favorites or suggest new ones to try.

Make it easy.
When kids come racing home hungry for a snack, chances are they’ll grab the most convenient item. Make fruits and vegetables convenient by placing them in spots where kids will see them first. Fill a large basket or bowl with fresh fruit and place it on the kitchen counter or table. Put bottles or boxes of 100% fruit juice on lower shelves where kids will see them when they open the fridge looking for a cool drink. Have “grab and go snacks” in small plastic bags (cut up raw vegetables, peeled and segmented oranges, seedless grapes, etc.) ready and waiting in your refrigerator.

For more recipes or information on fruits, vegetables, 5 A Day and nutrition, visit www.dole5aday.com.
Make it fun!
Capturing the imagination of kids can make eating fruits and vegetables more exciting. Present young kids with cut up fruits and vegetables, and then let them create funny faces or animals. While creating their masterpiece, they're likely to snack on the tasty building blocks. Here's a great recipe you can try at home:

**Trees in a Broccoli Forest**
Makes 8 "trees." Each "tree" provides one 5 A Day serving of vegetables.

**Dipping Sauce:**
- ¼ cup plain nonfat yogurt
- ¼ cup light sour cream
- 2 teaspoons honey
- 2 teaspoons spicy brown mustard

**Trees:**
- 16 DOLE® Baby Carrots
- 3 cups DOLE Broccoli, cut into florets
- 16 cherry tomatoes
- 3 tablespoons chopped fresh parsley

**Instructions:**
1. Prepare dipping sauce by combining yogurt, sour cream, honey and mustard in a small bowl.
2. Create each tree by putting 2 baby carrots side-by-side to create the trunk. Next, arrange broccoli florets around the carrots to create the leaves. Create a second tree on each plate, and then add four cherry tomatoes at the top of the plate. Spoon dip around the base of the carrots, and sprinkle with chopped parsley to create grass.
3. Have fun eating your trees!

Crunchy and sweet can't be beat.
There's no doubt about it—kids love bite-size pieces of fruits and vegetables. Crunchy, raw vegetables with dip are always a hit, and sweet pieces of ready-to-eat fresh fruit make great snacks. So if your 8-year old won't eat steamed broccoli, try offering him raw broccoli florets with a low fat dressing for dip. Chances are, he or she will gobble it up and ask for more!

Kids like to eat what they make.
Kids are more likely to try something they've helped prepare. To get your kids interested in making fruit and vegetable recipes, have them help find recipes to try. They can look in cookbooks, magazines, newspapers, and online for recipes the whole family can enjoy. Once they find a recipe they want to try, have them develop a shopping list. At the supermarket they can have fun hunting for the fruits and vegetables needed for the recipe. Back at home the fun of preparing the recipe will only be surpassed by the excitement of trying it.

Add fruits and vegetables to favorite foods.
Adding fruits and vegetables to favorite foods is an easy way to get a child to eat more fruits and vegetables. Put sliced bananas on top of cereal. Add slices of green and red pepper to cheese pizza. Make strawberry milk shakes with frozen strawberries, low fat frozen yogurt and milk. Put some shredded carrots and lettuce on a turkey sandwich. Add carrot 'coins' to chicken noodle soup. Put slices of tomato inside cheese quesadillas. Add pureed red peppers and zucchini to spaghetti sauce. The possibilities are endless. Simply use your imagination to come up with other ways to add some more fruits and vegetables to your child's diet.

I'm going to the park to play with my friends. Can you help me find my 10 snacks and play things?

I try to be active at least 60 minutes on most days. You should try. It's easy – walk the dog, play catch, or even clean your room.

Why did the tomato turn red?

I saw the salad dressing.
Equilibra Cada Día
Con Alimentos, Juegos y Energía

Me voy al parque a jugar con mis amigos. ¿Me ayudas a encontrar mis 10 bocadillos y juguetes?

Yo trato de estar físicamente activo por lo menos 60 minutos todos los días. Tú deberías hacerlo también. Es fácil: camina con el perro, juega con la pelota, o monta en tu bicicleta.

¿Qué le dijo el azúcar a la leche?

Podrías comer un bocadillo rápido y fácil.

Para reír: ¿Qué le dijo el azúcar a la leche?

¡Una Idea Poderosa!

Q: What do you call tired popcorn?

Fruits and vegetables are my secret power-pack to help me play hard everyday.

Chili Popcorn

You need:
4 cups popped popcorn
1 tablespoon melted margarine
1 teaspoon chili powder
A dash of garlic powder.

Mix popcorn and margarine. Mix seasonings thoroughly; sprinkle over popcorn. Mix well.

Serve immediately and enjoy with family and friends! Makes four 1-cup servings.

World Traveler

Which State is the largest grower of each of these fruits and vegetables? Match ‘em up!

Fruits/Vegetables | States
--- | ---
Pineapple | Florida
Sweet Potato | California
Blueberries | Washington
Cauliflower | North Carolina
Eggplant | Michigan
Apples | Hawaii

Grade 6 – 5.4 – Group Dynamics

ACTIVITY INSTRUCTIONS TEACHING OPTIONS

Going on a Journey

-Children stand in a circle and the leader explains that the group is going on a journey and needs to pack a fruit and vegetable that begins with each letter of the alphabet.

-The leader asks the group “How are we going to get to our destination?” “Are we going to walk, run, hop, etc?” The leader then selects a specific movement for the group to follow until the leader changes the movement.

-Begin by saying “I’m going on a journey and I’m going to bring an (apple, avocado, apricot, etc), and I am going to (walk, skip, run, etc)”.

-The group repeats the line as well as the food already listed and adds a food from the next letter in the alphabet.

-The goal is for all children to pack some fruits or vegetables for the journey. When the group can’t remember something, the game ends and it is time to start packing from the beginning.

-Older children can be challenged to remember and repeat each food listed.

-Smaller programs may play this game with all ages together.

-This game can be expanded to include other foods; for instance, instruct the group to pack healthy snacks and drinks.
