Consumer Beware

Even though you now know how and why to eat healthfully, why is it still so hard to make healthy choices? One reason is because you are constantly exposed to advertisements that tempt you to eat foods that may not be the best choice for your body. It is important for you to become an educated consumer so you can start to see past these ads and make healthy purchases despite what companies would like you to do.

Many of the ads you see for unhealthy behaviors are shown on TV. Coincidentally, the last full week of April is National TV Turn-Off Week. Get off that couch and do something physically active instead of watching TV!

Make healthy choices despite advertisements that encourage you to do otherwise.

Find an alternative to watching TV during National TV Turn-Off Week – go for a walk, read a book, go to the park with your friends, play a game with your family...

Companies use various advertising methods to encourage you to eat their foods, go to their restaurants, and buy their products. You see ads in the newspaper, in magazines, on TV, on billboards, and even on the food packages themselves. Companies will lower prices or include a toy to get you to buy their products. Restaurants will let you play a game or supersize an item for a few pennies more just to get you in the door.

Unfortunately, many of these ads are for unhealthy foods and are advertised on TV during the time most kids are watching their favorite shows. This impacts the types of foods they want from the grocery store or which restaurants they want to go to when the family goes out for a meal. By becoming an educated consumer, you and your students will not only begin to understand what companies are doing, but you also learn to make healthy choices regardless of what the companies would like you to do. (See KP KIDS handouts, “Eating Habits” and “Activity - Eating Habits”.)

National TV Turn-Off Week encourages everyone to turn his or her TV off for only seven days during the entire year. It is meant to provide people with an opportunity to take another step away from the constant barrage of advertisements. It is also a good opportunity for kids and adults alike to reevaluate how much time they actually spend in front of the TV and start to discover more physically-active things that could be done instead. Unfortunately, a lot of extra eating is also done in front of the TV so watching less TV also means eating less food. (See KP KIDS handout, “Activities to Enjoy Instead of Eating”.) This is an activity that will truly benefit everyone!

1) Take note of how many times the family buys food or goes to a restaurant because of something that is being advertised.

2) Start making choices about where and what to eat based on nutritional lessons learned throughout the year and not based on advertisements.

3) As a family, participate in TV Turn-Off Week (the last week in April). Make a list of everything you can do instead of watching TV. Keep the list posted on the refrigerator, or better yet, on the TV! (See Kaiser Permanente handouts, “Break Free of TV” and “Get Active and Be Healthy” in English and Spanish.)
1) Set up a friendly competition between classes to design the best advertisement for a healthy food or activity. This could be done as a print ad or as a mock-TV ad that can be shown to the whole school during an assembly. Display all healthy print ads created by the students around the school.

2) Create a student advisory committee to evaluate the school environment for products that may advertise any unhealthy behaviors.

3) Encourage students and staff to participate in National TV Turn-Off Week (last full week in April). (See http://www.tvturnoff.org)

Contact a local paper to run the school’s best healthy ad, or ask a local grocery store to display the print ads created by the students.

TV Turn-Off Network
http://www.tvturnoff.org
This website provides information on National TV Turn-Off Week, which is the last full week in April. Facts, events, and contest information are updated annually. Other materials are also available for purchase, such as bookmarks, pencils, posters and water bottles.

Student Media Awareness to Reduce Television (S.M.A.R.T.)
Stanford Health Promotion Research Center
http://hprc.stanford.edu/pages/store
(Item #: HPP6; Teacher’s Manual and CD-Rom; 2004, $199.00)
S.M.A.R.T. is a curriculum proven to motivate upper-elementary schoolchildren to reduce TV watching and video game usage. It was developed and evaluated in the San Francisco Bay Area.

“Where’s the Fruit?”
http://www.preventioninstitute.org/sa/fruit/
An interesting 2007 research study that addresses the fruit content of the most highly-advertised children’s food and beverages.

Common Sense Media
http://www.commonsensemedia.org
Common Sense Media, a non-partisan, not-for-profit organization which strives to provide trustworthy information and tools to improve the media and entertainment lives of children and families. It includes tips for parents to monitor media consumption, internet safety, and addresses the media effects on children’s health. Also a source for statistics on children and media consumption:

Activities Linked to 2nd Grade Content Standards & Framework

- Learn to tell time in relation to the amount of time spent watching TV. Determine duration of time in intervals of quarter hours and hours. From here, they can set a goal to decrease that amount during the month aiming for “zero” by National TV Turn-off Week (the last full week in April).

- Students can interview family members regarding the amount of TV they watch. Once the data are collected, they can represent the data with graphs or pictures and ask or answer simple, related questions.

- Students can record how many times they do not watch TV over a week. They can construct bar graphs of activities that they do instead of watching TV.

- Use fast food restaurants and magazine food ads to better understand the interdependence of buyers and sellers.
