What better time than the holidays to take a moment to appreciate all that makes us unique? Everyone comes to the table with a different story and with many food and exercise preferences. Spend some time this month getting to know a little more about your family and friends. What are their healthy habits during the holidays?

Appreciate other individuals’ food and exercise preferences.

What types of foods do you traditionally eat during the holidays? How did those foods become a tradition in your family? Are there any physically-active games that you like to play during the holidays? With each question comes as many answers as the number of people you ask. Everyone has a different story to tell. It doesn’t matter if they are old or young, boy or girl, or which state or country they were born in!

Finding out about other people’s food and exercise preferences also provides us with a whole new list of options from which to choose. Encourage your students to use this as an opportunity to try a new food or activity. How will they know if they like something new unless they give it a try?

Since a lot of cooking is usually done during the holidays, this is also a good time to try a new low-fat fruit or vegetable recipe. Students and their families can also start to experiment with favorite family recipes to see if they can make them just a little bit healthier. (See KP KIDS handouts, “Preparing Healthier Meals” and “Helpful Hints for Healthier Choices.”)

1) During a family gathering, spend some time sharing stories about family traditions. Encourage everyone to talk about traditions related to foods or physical activity (such as dance or a favorite outdoor game).

2) Start a new tradition by including some healthy food options at holiday parties.

3) Instead of baking candies, cookies and pies, try some new recipes for desserts that are lower in fat and possibly even include some fruits. (See any of the resources including KP KIDS handout, “Healthy Snack Recipes.”)
Celebrate!

1) Have an assembly to celebrate the many different cultures represented at the school. Parents and/or students can share food-related stories, dances or other physical activities common to their heritage.

2) If possible, highlight and serve foods from different cultures in the cafeteria this month.

Have a Holiday Potluck Celebration! Ask parents or teachers to bring in foods from various cultures. Aim for healthy menu items.

More recipe ideas and suggestions are provided at this site.
• Have the students share their favorite holiday traditions through an oral presentation. Encourage them to pay close attention to the foods eaten and any physical activities they may participate in.

• Students can describe the similarities and differences between fruits and vegetables. Discuss whether or not those similarities or differences influence their preferences for or dislike of the foods.

• Your class can have a taste-testing party and distinguish between different foods based on their five senses. Students can describe the different properties of the items tasted. They can then communicate their observations orally or through drawings.

• Start to look at where foods come from by discussing where people of earlier times got their foods. Encourage students to ask their parents, grandparents or guardians about the foods they ate during the holidays when they were young.

• Discuss the food preferences of the students in the class paying particular attention to any similarities or differences between the various cultures represented.
