

MISSION STATEMENT

The Santa Clara County Office of Education (SCCOE) is committed to serving, inspiring, and promoting student and public school success.

ABOUT THE COUNTY OFFICE

The SCCOE provides fiscal oversight, specialized student programs, technical assistance, and regional services to Santa Clara’s 31 school districts, 22 SCCBOE authorized charter schools, and over 280,000 youth.

The SCCOE is driven by the core principles of equity, diversity, inclusion, and partnership, and strives to address historic and systemic inequities, racism, and exclusion in education.

EARLY LEARNING AND CARE

Early learning and care programs can help address systemic inequities and are essential to working families.

MENTAL HEALTH

Strategic efforts and partnerships are necessary to affect the growing student mental health crisis exacerbated by COVID-19 and fund school based mental health and wellness programs.

DIGITAL EQUITY

All students need access to the internet and devices to access education, health, and social services.

DATA GOVERNANCE AND TRANSPARENCY

Data, when used responsibly, ethically, and strategically, can increase access to services and improve lives and academic opportunities.

FUNDING

Returning “excess” property taxes to the county office of education would result in the greatest benefit for high need individuals in our community.

SPECIAL EDUCATION

Students with disabilities are members of the general education community and are deserving of equal dignity, inclusion, access and opportunity.

HOMELESS STUDENTS AND FOSTER YOUTH

Efforts to ensure that homeless students and foster youth receive wrap services and have caring and supportive adults in their lives must be expanded and sustained.
