

Community-Based Learning for Community Schools: From Belonging to Agency

4-part Workshop Series

Event Information

The Santa Clara County Office of Education, in collaboration with Inflexion, invites you to a four-part professional learning series on Community-Based Learning. This series guides educators through the foundations of Community-Based Learning, from understanding its role in creating engaging, relationship-centered classrooms to designing learning experiences that honor students' cultural wealth and connect academic content to community assets and real-world issues.

Participants will explore strategies to build authentic partnerships with families and community organizations while creating opportunities for student voice, leadership, and purpose-driven learning. Join us to explore how Community-Based Learning brings the Community Schools Framework to life through meaningful, community-connected learning experiences.
