## Santa Clara Valley Math Association presents:

## A talk by David Foster, Silicon Valley Math Initiative

## The decisions and shifts required by the Common Core Standards

Teachers, administrators and parents are confronted with a significant change in K-12 education, as America shifts to the Common Core State Standards. These shifts require changes in math content, instructional practices, and the demands on students. The next generation assessments challenge students to think and do mathematics differently. Schools and districts are making and implementing important decisions about course offerings and student pathways. Negotiating these shifts and decisions will be discussed during this session and curricular and assessment tools will be introduced and shared.

Tuesday March 4, 4-5 pm

Lynbrook High School Library, 1280 Johnson Ave, San Jose, CA
